One Unified Platform

myAvail—the Enterprise Transit Management Software (ETMS) that empowers agencies to drastically improve efficiency, tracking, and compliance.

Transit agency software usually focuses on CAD/AVL. But what if the same platform that runs your buses and schedule also runs your business tasks? myAvail allows you to harness the power of Enterprise Transit Management Software (ETMS) to support all aspects of your agency—from buses and dispatch to finance and administration. Then, all of your information is in one place for ease of analysis and reporting.

Features Include

- Enterprise Transit Management Software (ETMS)
- Role based user interface
- CAD/AVL
- Centralized database
- Business intelligence

Solutions For:

Reduce Roadcalls

Proactively maintain your fleet and monitor real-time bus status to reduce roadcalls
